Jl. William Iskandar No.107,Sido Rejo, Medan Tembung, Medan

Hi, I'm Jeremia, a computer science student at Medan State University and also a Mobile Development student at Bangkit 2023, currently focusing myself on software development specifically on android platform. When it comes to software development, I am undoubtedly put attention on it, it amazes me of things involved to build an application, such as the architectures, design patterns, tools, programming languages, frameworks, documentations. I'm looking forward to work on a team to enrich my knowledge and therefore currently seeking for new opportunities, I am an eager learner with a willingness to always grow better. Can't wait to join a team and contribute my best, let's work together.

Work Experiences

Ramu IT - **Medan, Indonesia**   Oct 2022 - Feb 2023

Android Developer

Ramu IT is a software house focusing their purpose to provide a good quality software in several platforms such as website, android, and desktop.

Organisational Experience

Bellshade - **Github**   Jun 2021 - Present

Maintainer

Bellshade is an organization engaged in education and is open source. Bellshade is managed and under the auspices of the UNPAS Web Programming Community (WPU).
The name Bellshade itself is taken from English which means "study lamp cover", which directs the light from the lamp to focus on the goal and on target. With this name, Bellshade is expected to become a vessel to illuminate and direct and provide knowledge to people who need it, especially in the field of technology.
